

Postdoctoral Associate Position in Intersectionality in Epidemiological Methods

The Health Equity in Epidemiology Research Group (Bauer lab) is accepting applications for a full-time postdoctoral position with Dr. Greta Bauer in the department of Epidemiology and Biostatistics in the Schulich School of Medicine & Dentistry at Western University in London, Ontario, Canada. We seek the strongest candidate, so both the start date and the duration of the position (1 year minimum) are negotiable. In light of the COVID-19 pandemic, the position will start as a remote position.

The successful candidate will work with Dr. Bauer on methods research within her CIHR Sex and Gender Science Chair: “**Epidemiological Methods in Sex- and Gender-Based Analysis Plus (SGBA+): Advancing Intersectional Approaches to Sex and Gender Science**”. This postdoctoral fellowship provides opportunities to work on issues of study design, measurement, and statistical analysis related to quantitative applications of intersectionality in health research, to apply these methods to applications across a range of potential topics, and to develop knowledge translation tools to build the capacity of other researchers.

Essential qualifications include a doctoral degree in a health-related field, strong methodology background and statistical analysis skills, and ability to work well independently and as part of interdisciplinary teams. The ideal candidate will have a serious commitment to health equity, excellent oral and written communication skills, and a record of peer-reviewed publication. Additional knowledge translation experience would be a plus.

To apply, please submit a cover letter describing research interests, a CV, contact information for three references, and one to three peer-reviewed publications, with at least one as lead author. Please submit the application via e-mail to Dr. Greta Bauer at gbauer@uwo.ca.

Applications will be considered beginning on March 15th, 2021.
